- SAP B1 – HANA Integration

EDUCATION

Certificate in Web & App Dev
Sir Syed University of Eng. & Tech

Bachelor of Commerce (B.Com)
University of Karachi

LANGUAGES

English — Professional
Urdu — Native

PROFESSIONAL SUMMARY

Results-driven Senior MERN Stack Developer with 7+ years of experience building enterprise-grade web platforms, including ERP, attendance, QA and RPA automation systems, with SAP Business One & HANA integration. I turn complex requirements into fast, secure, user-friendly products. Key results: 90% faster API response, 80% better load speed and 95% fewer production bugs. A strong team player in Agile/Scrum environments who owns delivery and ships features ahead of deadlines.

WORK EXPERIENCE

Sr MERN Stack Developer
Aug 2023 – Aug 2026

QBS.CO · Karachi

- Engineered secure SAP Business One & HANA integration for real-time ERP data sync with MERN apps.
- Built and optimized full-stack MERN applications with secure, scalable REST APIs and optimized MongoDB schemas.
- Developed reusable React.js components and led debugging/integration testing within Agile/Scrum teams.
- Reduced API response time by 90% via MongoDB query optimization and Redis caching.
- Improved application performance/load speed by 80% through code-splitting and React optimization.
- Cut production bugs by 95% by introducing structured testing and code-review practices.
- Delivered 100%+ features/modules ahead of sprint deadlines, boosting team delivery speed.

Associate MERN Stack Developer
Oct 2020 – Oct 2022

Bitwits · Karachi

- Delivered enterprise dashboards with secure role-based access and clear data visualizations.
- Translated complex business requirements into intuitive, responsive user interfaces.
- Raised code quality and sped up delivery through peer reviews and reusable components.

Jr. MERN Stack Developer
Nov 2018 – Nov 2019

Viznode · Karachi

- Contributed to full-stack web applications from day one, delivering assigned modules on schedule.
- Built responsive interfaces and integrated backend services alongside senior engineers.
- Resolved bugs quickly and wrote clean, reusable code that strengthened product stability.
- Collaborated in Agile/Scrum workflows with consistent, on-time sprint contributions.

MERN Stack Developer
Jun 2016 – Jun 2017

Panacloud · Karachi

- Developed end-to-end web features, from user interface to server logic.
- Designed clean, responsive interfaces that delivered a smooth experience across devices.
- Built reliable APIs that connected the interface with business logic and data.
- Collaborated closely with the team to meet project deadlines and quality standards.

KEY PROJECTS

WaslHub.ai
Payments and invoicing platform to create and send invoices, collect online payments and track every transaction with real-time status and reports.
waslhub.ai

QBS.CO Website
Corporate website showcasing QBS.CO's services, solutions and portfolio with a modern, fast, fully responsive and SEO-friendly design.
qbsco.net

Vibe Ecommerce Admin Portal
Admin portal for the Vibe e-commerce platform to manage products, orders, customers and inventory, with sales insights from one dashboard.
vibe.qbscocloud.net

Connect QBS
Mobile attendance application for employees to check in and out daily and view attendance history and reports, with a custom-built inline calendar.
Google Play

Vibe Ecommerce App
E-commerce mobile application to browse products, manage the cart and place orders, with a smooth, fast and user-friendly shopping experience.
Google Play

Lockkeyz
Security and access mobile application to manage locks and keys, control user access and permissions and monitor access activity securely.
Google Play

Blue LPG
LPG management portal to handle customers, orders, cylinder stock and deliveries, with role-based access and dashboards for daily operations.
psopk.com/en/fuels/blue-lpg · Portal Login

NeuConnectZ
Warehouse and inventory management application to track stock across locations, manage inbound and outbound movements and report in real time.
Live Demo

Rebootz.ai
Smart maintenance application to schedule and track maintenance work, manage assets and monitor project status from a live dashboard.
Live Demo

Pak Gas
Customer mobile application to place and track LPG orders, manage delivery details and stay updated through a simple, easy-to-use interface.
Google Play

Shaker Care
Customer care mobile application to request services, track their status and stay connected with the support team through a clean interface.
Google Play

ADDITIONAL PROJECTS

Masjid Nearby
Location-based platform that helps users discover nearby masjids with maps, directions and key details, so worshippers can find the right place quickly wherever they are.

masijdnearbyfrontend.vercel.app

Accounting Portal
Accounting application to record journal entries, view T-accounts and generate trial balances automatically, giving accurate books and clear financial visibility.

accountfrontend.vercel.app

POS System
Point-of-sale system for fast billing, product and stock management and sales tracking, with daily reports and secure role-based access for cashiers and managers.

posfrontend-dun.vercel.app

RFID System
RFID management system to register tags, track items and their movement in real time, log every scan and report on activity from one central dashboard.

rfidfrontend-two.vercel.app

AI Homeopathic Inventory
AI-powered inventory application for homeopathic medicines to track stock, potencies and expiry dates, with smart insights and low-stock alerts to avoid shortages.

ai-homeopathic-inventory-frontend.vercel.app

Water Management
Water supply management application to handle customers, deliveries, billing and payments, with clear status tracking and reports for day-to-day operations.

waterfrontend-three.vercel.app

ERP System
End-to-end ERP platform that unites inventory, sales, accounting and reporting in one place, with role-based access so every team works from the same data.

erpfrontend-two.vercel.app

Visa Management
Visa processing system to manage applicants, documents and application stages, with real-time status updates and organized client records in one place.

visafromend-three.vercel.app

Inventory Management
Inventory application to track stock levels and purchase and sales movements across items, with low-stock alerts and real-time reports for better control.

invfrontend.vercel.app

Blood Bank System
Blood bank management system to manage donors, stock by blood group and requests, with live availability tracking so life-saving supply is easy to find.

bloodfrontend-six.vercel.app

SOFT SKILLS

- Problem Solving & Analytical Thinking
- Agile / Scrum Teamwork
- Leadership & Mentoring
- Attention to Detail
- Client Communication
- Team Collaboration & Communication
- Time Management & Prioritization
- Adaptability & Continuous Learning
- Debugging & Troubleshooting
- Project Ownership & Responsibility

ACHIEVEMENT

Custom Inline Calendar Development
QBS.CO · Connect QBS

Designed and built a fully custom inline calendar from scratch for the Connect QBS attendance platform. Handled complex date logic, attendance states and responsive behavior, and delivered it successfully against a demanding scope. It became a core feature of employee check-in/check-out tracking and reporting.
